Employers

- Working as **Senior Software Developer** at Foray from Jan 2022 to till now.
- Worked as **Senior Software Developer** at MPhasis from Mar 2021 to Jan 2022.
- Worked as **IT Analyst and Technical Lead** in Tata Consultancy Services from Feb 2016 to Mar 2021

Achievements	Achievements Snapshot
<i>Best Performer</i>	• Recognized as one of the top performers. • Many client appreciations for innovative and excellent work • Trained teams on Java Development and Spring • Trained teams on Development and Automation using Java and UFT • Designed generic Libraries in java to make the future work of me and my colleagues easy • Designed and developed a Conversion Tool and Validating Tools from scratch which was well received by customer.

Certifications

- Certified in **Problem Solving** by HackerRank
Certificate: <https://www.hackerrank.com/certificates/90be6212aff7>
- Certified in **Java** by HackerRank
Certificate: <https://www.hackerrank.com/certificates/093d0736f82a>
- Certified in **Python** by HackerRank
Certificate: <https://www.hackerrank.com/certificates/8144c6dd2a92>

Education

- B.Tech from Bapatla Engineering College during 2011 – 2015
- Intermediate(M.P.C) from Vignana Bharathi Junior College, Board of Intermediate during 2010 – 2011
- 10th from Sri Sai High School, Board of Secondary Education during 2009 – 2010

Projects

Project #1

- Title : RISK Management
- Client : VISA
- Environment : Java, Spring Boot, Micro Services, Angular 8
- Role : Senior Software Developer

Description:

Processing of Customer applications and verifying client details. Integrated system with various services deployed on server to perform validation of customer information.

Responsibilities:

- As a Developer, planned the approach to solve critical problem and directed the team.
- Ensured proper integration between applications
- Labelling the critical deliverables and ensured safe backups
- Played a significant role in solving technical problems
- Resolved build and release dependencies in collaboration with other departments

Project #1

- Title : KYC Management
- Client : JP Morgan
- Environment : Java, Spring Boot, Micro Services, RESTfull WebServices, Angular
- Role : Senior Software Developer

Description:

Processing of Customer applications and verifying customer details. Integrated system with various services deployed on server to perform validation of customer information.

Responsibilities:

- As a Developer, planned the approach to solve critical problem and directed the team.
- Ensured proper integration between applications
- Labelling the critical deliverables and ensured safe backups
- Played a significant role in solving technical problems
- Resolved build and release dependencies in collaboration with other departments

Project #2

- Title : Fulfillment Services
- Client : Best Buy
- Environment : Java, Spring Boot, Micro Services, RESTfull WebServices, Hibernate, Angular
- Role : Scala Developer

Description:

Fulfillment Services project takes care of availability, Shipping and delivery options, Seasonal Offers of products in store overall stores of Bestbuy in Mexico based on their location.

Responsibilities:

- Taken care of regular build and deployment of application.
- Ensured proper integration between applications
- Labelling the critical deliverables and ensured safe backups
- Played a significant role in solving technical problems
- Resolved build and release dependencies in collaboration with other departments

Project #3

- Title : Digital Assistant
- Client : Best Buy
- Environment : Scala, Google DialogFlow, Spring, Akka, Groovy, Micro Services
- Role : Java Developer

Description:

Digital Assistant is a chatbot like Google Assistant for a retail Store which can be used to have an interactive conversation with the user and provides all the necessary information required by the user.

Responsibilities:

- Taken care of regular build and deployment of application.
- Configured the conversations in Google DialogFlow
- Ensured proper integration between applications
- Labelling the critical deliverables and ensured safe backups
- Played a significant role in solving technical problems
- Resolved build and release dependencies in collaboration with other departments

Project #4

- Title : AE Media Manager
- Client : Internal
- Environment : Java, Swings, VbScript, DB2, UFT, Jenkins
- Role : Java Developer

Description:

AE Media Manager is an integrated Automation tool which continuously checks for new claims and processes them automatically and mail the results to configured ids on success or failure of the process.

Responsibilities:

- Taken care of regular build and deployment of application.
- Designed and implemented the partial tool in Swings.
- Maintained and updated source code repositories on a regular basis
- Ensured proper integration between applications
- Labelling the critical deliverables and ensured safe backups
- Played a significant role in solving technical problems in onsite and offshore locations
- Resolved build and release dependencies in collaboration with other departments
- Did documentation and given necessary demos

Project #5

- Title : Evidence Manager
- Client : Internal (Innovation)
- Environment : Java, DB2, Swings.
- Role : Java Developer

Description:

Evidence Manager is a GUI application which runs in the background to take continuous evidence without deviation to other window and can do basic image editing as MSpaint for highlighting the critical portions of image, undo or reset the image to its original at any time and can export all the images with its respective titles, timestamp and description to a word document for future reference.

Responsibilities:

- Developed the application from the scratch
- Participated in required sessions to learn development of Image editing using java.

- Taken initiative to project the requirement of application and its Importance.
- Given necessary demos to the teams to make them understand the usage of the application.
- Labelling the critical deliverables and ensured safe backups
- Ensured all the required approvals from the customers to use the application.

Project #6

- Title : Copybook Manager
- Client : Internal (Innovation)
- Environment : java, Swings, COBOL, DB2
- Role : Java Developer

Description:

Copybook Manager is an application which is used to view any mainframe datasets in tabular form in an Interactive GUI with dynamic components which make application easy to use and export the dataset to text file with the same tabular structure or to excel file or html format for further reference

Responsibilities:

- Played a significant role in solving technical problems in onsite and offshore locations
- Taken daily builds, deployment and resolved the issues
- Labelling the critical deliverables and ensured safe backups
- Resolved build and release dependencies in collaboration with other departments
- Effectively supported whole team to solve technical challenges
- Performed unit testing and involved in code review
- Trained, mentored and motivated team members
- Conducted internal meetings and demo and training sessions
- Prepared necessary documentation
- Continuous maintenance to make code stable and to keep its dynamic and generic nature stable.

Project #7

- Title : Customer Data manager
- Client : Kumar Cotton Centre
- Environment : C#.Net , SQL Server, Win Forms
- Role : Freelancer

Description:

An Interactive GUI application for a saree shop to maintain its daily transactions, can also generates and prints the reports on demand based on user selected criteria.

Responsibilities:

- Labelling the critical deliverables and ensured safe backups
- Prepared necessary documentation
- Taken effort to make the application highly interactive so that it can be used by the user with no technical skills.
- Continuous maintenance to make code stable and to keep its dynamic and generic nature stable.
